

PRODUCT SPECIFICATION BULLETIN

J SERIES

The Wizard® J Series models are specifically engineered for scrapping drums, cutting on the outside of the drum shell without requiring smooth, dent-free chimes. Fully remove drum tops and/or bottoms for efficient drum flattening, reducing storage space and minimizing future liability.

ELECTRIC

Electric Models are chosen when quiet operation is preferred.

- 1/3 HP, 110-V, 60Hz, Single Phase, Full load Amps 5.7 and 220in/lbs torque
- Optional 220-V single phase/50 to 60Hz electric models available upon request
- Unit Dimensions: 29" x 29" x 13"
- Shipping Weight: 80 lbs.
- Completely enclosed, fan-cooled motor

MANUAL AIR

The air model is preferred in industrial settings where floors and work areas are wet.

- 80-100 PSI, 25 CFM
- 1/2 HP, Variable Speed, 4-Vane Reversible Air Motor and 30:1 Gear Reducer
- Dimensions: 29" x 29" x 13"
- Shipping Weight: 80 lbs.

AUTOMATIC AIR

The automatic air model is effective when a large number of drums are being deheaded.

- 1/2 HP, Variable Speed, 4-Vane Reversible Air Motor and 30:1 Gear Reducer
- Automatic powered cutting and Plunger Valve control
- Dimensions: 29" x 29" x 13"
- Shipping Weight: 84 lbs.
- Cutting pressure is automatically retained

BENEFITS

- FAST - deheads in less than two minutes
- Removes entire drum head
- Easily removes solidified contents with ram compactor
- Swivel connections prevent tangling
- Cuts through dented chimes
- Continuous cutting with round cutter wheel
- Low maintenance and long lasting
- Easy for flattening and drum recycling
